Free for HKWMA Members and \$100 for non-members.

Each applicant is required to pay \$100 in advance for registration.

Language

English

Programme Highlight

T.Park

T · PARK signifies the continuous drive to shape Hong Kong's "waste-to-energy" ambitions for the good of the community. T·PARK is more than just a sludge treatment facilities, it also reflects a vision to encourage positive change in people's attitudes and behaviours towards waste management and resource recovery and recycling. It is more than just a plant, but a place to learn and engage in Hong Kong's green force through its recreational and educational facilities.

T·PARK has a capacity of handling about 2,000 tonnes of sludge per day by high-tech thermal process. It adopts advanced incineration technologies to reduce about 90% of the original sludge volume by converting the sludge into ash and residues. The heat energy recovered from the incineration process is turned into electricity which is able support the needs of the entire facility, including the T·SPA.

This technical visit will be guided by T·PARK representatives.
